

Electric Motor Repair

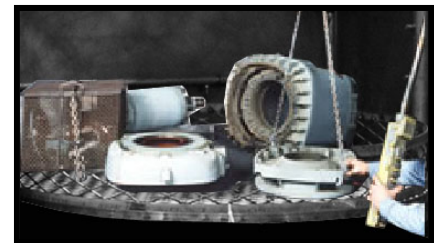

Industry – Electric Motor Parts Cleaning

JRI Industries is the leading manufacturer for heavy duty parts cleaning equipment. With industry specific options that make it easier for the end user to use the machine for the task at hand. (i.e. probe manifolds, pump upgrades, high pressure nozzles, and custom part fixtures). With the correct combination of pressure/flow and specifically designed chemistry; JRI heavy duty parts washers are tasked with cleaning some of the dirtiest parts with ease.

Not only does JRI bring the best parts washers in the industry to its customers; they offer world class service and support after the sale as a one stop vendor for chemicals, parts, and service. Factory certified technicians are available for onsite consultation and evaluation of your current cleaning process and technical assistance in the future.

JRI has supplied enough satisfied customers in the electric motor repair and service industry with machinery to know the specific needs of their industry. JRI parts washers are an effective way to clean the armatures, housings, rotors, and shafts from AC, DC, and traction motors alike. JRI parts washers are a safe environmentally friendly way to speed up your current cleaning process.
